Company Introduction

The foundation of the group, is motivated by the struggle of making. a positive way for the group, we are building a diversified profile. We are developing asset portfolio of Copper, iron ore and steel, Platinum metal groups, Nickel and Gold projects and commodity trading. We are teaming up, with specialists in technical and analytical sector. The company was founded in 2019, by Neo Mashiloane. The company currently is under, the leadership of independent appointed director, and none executive officer. Fortune Mabuza, and Kagiso Chiloane. Zanele resources group, is a company with a dream for positive industry. We are in for pioneering change and improving, the mining and African economy. With our diversified portfolio, we are channeling our focus in the transitioning. And conceptualizing, the global green zone, with a positive strive. For better engagements, adherence and the ability to create value and sustainability

Services we offer

We have designed our services to be in line, with our portfolio. We provide and design costumer plan, and end user support, for clients. We focus on the production of copper ore, and pre-concentrate of copper. We are servicing beneficiation companies, smelters and foundries. Our production and service solution are in the following option

We are offering three copper segment service plans

- Copper Ore (1,680,000 metric ton annually)
- Concentrate (504,000 metric ton annually)
- Cathode/ Anodes (capacity on customer request/spec)
- With potential market in (Asia pacific, Japan, China, Netherlands and Middle east)

Our gem and gold service segment

We are trading, and banking on commodities beyond copper, we do run in house. Gold smelting and furnacing to the capacity of 500kg of gold. And we source/ buy/ trade/ supply with polished and uncut gem and diamonds. With our integrated tertiary partners, we are having the ideal capacity. To deliver and design client requirements and specifications. Our copper mine is located in, Dodoma district, east Africa (Tanzania). Which is a 50/50 joint venture (operations) with, Opal Africa Limited (Tz) and our sources for gold/ gem and diamonds, are within the African Land. With partners from Tanzania and Ghana.

The background of the slide features a photograph of a ship at night, with its mast and rigging visible against a dark sky. The ship's lights are on, creating a warm glow. Overlaid on this image are two large, concentric blue circles that frame the text. The outer circle is a darker shade of blue, while the inner circle is a lighter shade. The text is placed within the inner circle.

Our implementation plan and integration

The company is made up of diversified culture and background and the ideal and concept is unique, and enough to make success. We are driving a favorable portfolio, and the drive behind the company, is fully backed and supported by investors, technology, people and our equipment. The following are our prospect definition.

Investors: we strongly believe in, positivity and clear investment portfolio. As part of our investment plan, we are focusing on modeling development. For our mining operations and beneficiation of minerals. We are driving, cost effective project development program, which will enable our investors. To see value for sustainable plan and development, with our investor's guidance, we can deliver solutions and integration.

Technology: in our copper mine we are using advanced technology, to help increase momentum for the project. in delivering quality product, with the sorting technology from TOMRA, we are able. To sort and classify our raw material and tailings. And the use of drones to survey the mine and resources reporting, we are able to identify mineral zones easily. And with our hauling trucks, shovels, rigs and crushing processing plant, we are having the drive to handle capacity.

People: the company is of diversified group; our capabilities and skills are different. However, we role in common objective, of delivering project and investment goals. We are in for creativity and, development, educating, and sharing value. Our priority as company when it come to our people, is that we are aiming. For equal share of designation, opportunity and development, training and educational entry level. And the better the mining industry, by recruiting and promoting ‘women in mining program” we need more women, on the ground and in the boardroom, the mining industry is changing.

Equipment and machinery: having the mine backed by, concept S431B which is in-mine trucking project. the development is motivated by, our testing of traditional mining and hauling, using trucks and other mobile equipment. Because we want to tailor our plant to integrate, solution for, clear mining and safe operations and user-friendly trucking and hauling.

Our policy and statements

We are a group, that is passionate about learning and heading, development of project concepts. We are driven by the motion, of paving and impacting change in the, mining and cement, gold industry. We are thinkers, project developers, and project managers technically. Our ideal background is being challenged in bringing solution and, light to the heavy mining sector.

Our key mission: we are driving economic desirable development, concepts. Our craft is based on the theme of sustainable and advancement, of our development strategy. Our aim is to develop projects which, are more traditional and modern. In a sense that it will be easy to achieve the zero-harm, zero-injury and zero-pollution. In our mining projects and facilities, equipment and people or investment, 'we are developers and planners.'

Our vision key: our goal is to drive and develop a favorable profile and, to model our development to, be cost effective. And to lead a profile that, will be easily to operate and be lucrative to investors and potential sponsors. And we are open to the ideal, of green solution and biotechnology. And our priority is to better investment and cater our investors. we are in for value for healthy economic and trade opportunity, and better, reliable engagement and tailoring a trustiest team. To gear our stakeholders and investor relations.

Group objective: our plan is for development and transformation, not only for our operations. However, we want to see and be part of the African pavers, policy makers or advisers, show casers. As we are in mining sector, this shall be our first door to use in securing. Entry level for voicing out our concerns. And we are leading innovative plan, for our projects which will strongly needs investor's attention. As we are bringing new concepts, as the industry moves head, the goal is to be sustainable and cost effective.

Focusing on environmental, safety, health is our priority. As a group we are striving to ensure well-being of our surroundings and. Betterment for our investors/investment and people nor fauna and flora, or significant land marks such as cultural land. Or other related theme to be preserved like parks or secured heritage land marks).
