

CHANDANA M H

Thotada Mane, Kaluve Road, Belimallur, Honnali-577217

Email: chanduchandanamh23@gmail.com

Phone no : 8197624909

CAREER OBJECTIVE

To Work leading Company and to use Analytical Thinking to the best of my ability combined with perseverance, so as to contribute to organization growth and goal, as well as attain professional goal.

BSc Student with Combination of Computer Science and Electronics .Have the knowledge about Python , Web-Tech, Javascript and HTML. Developed on Projects of “House Name Detection using Python with ML” And “Smart Crop Monitoring System using IoT”

EDUCATION

DVS College of Arts and
Science, Shivamogga.
8.62 CGPA

Shree Chennashwara Rural PU
College, Hiekalmata Honnali .
62%

Shree Uma Pragathi High
School Belimallur
80.16%

TECHNICAL SKILLS

- Languages: C,Python,HTML,
- Database: MySQL
- Tools: VS Code,IDLE,Pycharm.
- Expert in Excel,MS Word and Power Point
- Kannada English Typing

SOFT SKILLS

- Problem-Solving
 - Analytical Thinking
 - Leadership
 - Time Management
 - Quick Learner
-

PROJECTS

House Name Prediction

- The house name prediction project uses Python and machine learning to automatically identify and extract house names from address texts or images. It leverages NLP techniques or OCR for text processing, and classification or named entity recognition (NER) models for detection. Project materials typically include labeled datasets, preprocessing scripts, and trained ML models. Future scope includes improving accuracy with deep learning (e.g., BERT), handling multilingual data, and deploying as an API or mobile app for real-world use.

Smart Crop Monitoring System

- The Smart Crop Monitoring System uses IoT sensors to monitor real-time parameters like soil moisture, temperature, humidity, and light intensity to support precision farming. Data is transmitted to a central system for analysis, helping farmers make informed decisions on irrigation and crop health. It reduces resource wastage and increases productivity. In the future, integration with AI and automation can further enhance predictive analysis, autonomous farming, and sustainable agriculture practices.
-

LANGUAGES KNOWN

- English
- Kannada

EXPERIENCE

- Fresher

DECLARATION

I here by declare that the information finished above is True and Correct to the best of my knowledge.
