Why Delibo is the Perfect Fit?

✓ **Make in India – 100% Indigenous Manufacturing**

- Designed and **manufactured** entirely **in India**, ensuring faster delivery timelines, easier support, and zero dependency on imports.

✓ **Seamless API Integration**

- **Robust APIs** available for effortless integration with your facility management systems, resident apps, and visitor management platforms or even existing Smart Locker System.

✓ **Unique Value Proposition (USP)**

- Fully **modular, scalable**, and **customizable** locker systems.
- **Advanced security** with tamper alerts and real-time access tracking.
- Supports **multiple use cases**: parcel management, and secure item exchanges.
- Enhances property value by offering a modern, **tech-enabled amenity** for residents and tenants.

The Smart Choice

Residential Complexes

- **Security and Convenience:** Ensures secure storage and 24/7 availability for parcel collection, enhancing tenant convenience and satisfaction.
- **Privacy and Safety:** Minimizes strangers' access to the residential area, increasing privacy and safety for residents.
- **Amenity Appeal:** Acts as a value-added amenity that can attract new tenants and retain existing ones.

Universities, Colleges, Office Spaces

- **Efficiency in Parcel Handling:** Streamlines the receipt and distribution of business parcels, freeing up administrative resources.
- **Employee Convenience:** Allows employees/students to receive personal parcels at work, adding to workplace amenities.
- **Reduced Lobby Congestion:** Limits parcel-related traffic and clutter in lobby areas, maintaining a professional environment.

Multiplexes & Malls

- **Enhanced Visitor Experience:** Offers visitors the convenience of picking up parcels during their shopping or entertainment outings.
- **Increased Foot Traffic:** Attracts additional visitors who come to collect parcels, potentially boosting sales for tenants.

delibo.in

Co-working Spaces

- **Attracts Members:** Enhances the appeal of co-working spaces by offering convenient, secure parcel services as an added benefit.
- **Community Management:** Eases the management of parcels for a diverse and rotating community of users.
- **Flexibility:** Supports the flexible, dynamic nature of co-working spaces by accommodating after-hours parcel collections.

IT Parks

- **Scalability:** Offers a scalable solution for large campuses where employees receive numerous parcels, reducing the load on administrative staff.
- **Tech-Savvy Solution:** Aligns with the technology-oriented environment of IT parks, enhancing their modern infrastructure.
- **Centralized Management:** Provides a centralized system for managing parcels across multiple buildings within the park.

Retail Stores

- **Customer Service Enhancement:** Provides customers with a convenient option to pick up online orders, enhancing the shopping experience.
- **Drive Traffic:** Encourages additional foot traffic to the store, potentially increasing sales.
- **Space Efficient:** Manages online order pickups without requiring significant retail space.
